Sakila sample database was ported to the following databases

- Oracle
- SQL Server
- SQLite
- Interbase/Firebird
- Microsoft Access
- PostgreSQL
- DB2
- Exasol

by DB Software Laboratory

<http://www.etl-tools.com>

Original Sakila for MySQL and Pagila are included as well for the user convenience.

(Files to delete data and drop database objects were created DB Software Laboratory)

Background:

Sakila example database was originally developed by Mike Hillyer of the MySQL AB documentation team.

This project is designed to help database administrators to decide which

database to use for development of new products

The user can run the same SQL against different kind of databases and compare the performance
